

Cryogenic Stainless Steel Globe Valve

The Wonkwang range of extended globe valves have been designed to eliminate leakages, maximize lifetime operation and reduce maintenance and spares cost.

The range is available with either screwed ends, socket ends or stubs and utilizes Wonkwang's unique independent bonnet and flange design, eliminating leakage through the flange gasket.

All valves are assembled in clean room conditions and pressure tested prior to dispatch

Bill of Materials

NO.	PART NAME	Q'TY	MATERIAL	NO.	PART NAME	Q'TY	MATERIAL
1	BODY	1	A351-CF8M	20	BONNET BOLT	1SET	A320-B8M CL 2
